INDUSTRIAL LAUNDRY APPLIANCES

Bag System Controller

State of the art controller for big and small bag systems

Applying the TEXCONTROL Bag System control system empowers you to monitor and increase the production efficiency of your Bag System. The 5.7, 8.4 or 10 inch touch screen makes it easy to operate and shows an instant clear overview screen with alarm or message text, article and customer information.

Bag System Control Features:

- flexible for all brands of bag systems
- for small or medium sized bag rail systems
- sorting directly in bags or in bins
- includes operation of lifts and switches
- overview of bags on screen
- customer and content information per bag
- interfacing with all types of continuous batch washers
- easy modification and adjustment of parameters
- production counters per customer and day totals
- world wide component support
- internet connection for remote support
- can be integrated in TEXVIEW application
- competitive price

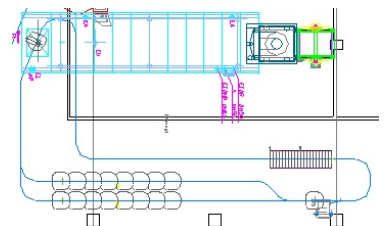

Integrated with TEXVIEW

The TEXCONTROL Bag System control is prepared to be connected to the TEXCONTROL Management Information System TEXVIEW. This will give managers, engineers and operators detailed information about production figures, rejects, downtime, errors, warnings and other statistic data.

TEXCONTROL®
LAUNDRY AUTOMATION

Technical Specifications

- High Screen resolution and a choice of touch screens: 5,7", 8,4" or 10 inch.
- Connection from PLC to inputs/outputs with standard Ethernet CAT5E cable.
- Software update by Ethernet cable or Flash Card.
- Full backup and restore capability.
- Ethernet connection enables the support over the internet as well internally in the laundry as remotely from the Texfinity offices.
- Automatic parameter backup on internal flashcard. No data loss in case of an empty battery.
- STN or TFT touch screen with 32.768 colors
- Perfect brightness to improve readability in all circumstances
- Long life back light (min. 75.000 hours)

Small 2 x 10 bag loop

Program Specifications

The Bag System control has following features which improve the management of the system and increases productivity and efficiency:

- User friendly controller, which visualizes the location of the linen in the bags.
- From a small loop with 10 bags and one or two storage lines, to medium sized systems. Mainly intended for re-used bag systems, where a new controller is needed or where the system has been modified.
- Control and visualization of sorting bags or sorting bins, including sorting conveyors.
- Customer and product selection
- Displays show current and desired weight of sorting bags and bins
- Interfacing with all brands of CBWs
- Call off of dirty linen
- iPad or tablet support via the overview system, to monitor your systems remotely.
- Alarm and error lists on screen
- Provided with English, French, Spanish or Dutch user manual.
