### Eenvoudige netwerkintegratie

Modbus RS-485 is standaard geïntegreerd in de RJ45-poort aan de voorzijde van de frequentieregelaar. Extra frequentieregelaars aan het netwerk toevoegen kan nu heel eenvoudig zonder dat daarvoor een extra optiekaart per regelaar nodig is. Zo bespaart u geld en ruimte.

### Eenvoudige communicatie-instelling

Ook in de compacte CP1 PLC-familie zijn de Modbus-instructies geïmplementeerd dankzij de Modbus-RTU Easy Master-functionaliteit. Hierdoor kunnen frequentieregelaars eenvoudiger dan ooit in het netwerk geïntegreerd worden.

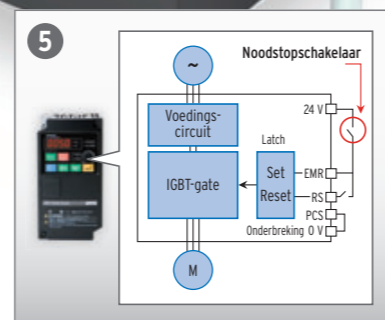

### Ruimte- en kostenbesparend

De nieuwe JX is voorzien van een ingebouwd EMC-filter die kosten- en ruimtebesparend werkt in vergelijking met de standaard oplossing voor externe filters.

# Alles aan boord voor uw toepassing

## Geen extra apparaten nodig

Zelfs een geavanceerde functionaliteit als de PID-regeling is standaard op de JX-frequentieregelaar. Hierdoor is de regelaar een handige oplossing voor toepassingen als pompen en ventilatoren, waar druk-, stroom- en andere processen geregeld moeten worden.

## Gemakkelijk en efficiënt

Er kunnen parameterinstellingen voor twee verschillende motoren worden opgeslagen. Hierdoor kan één frequentieregelaar twee verschillende motoren aansturen. Beide motoren werken nooit tegelijkertijd.

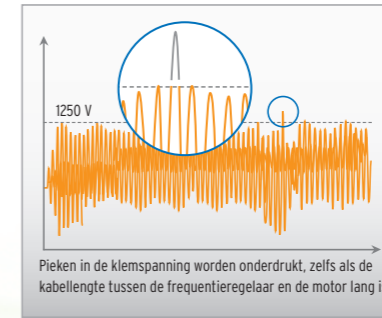

## Betrouwbare noodstopfunctie

De uitgangen van de IGBT's wordt direct losgekoppeld van de externe ingang, zodat de motor niet meer van energie wordt voorzien. Deze hardware-oplossing is betrouwbaarder dan andere CPU-gebaseerde oplossingen.

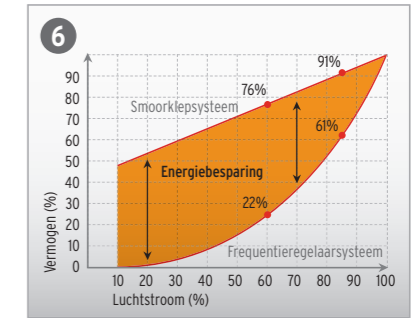

## Stille werking

Afhankelijk van de temperatuur in de frequentieregelaar zorgt het uitschakelen van de ventilator voor een geluidsvrije omgeving en wordt de levensduur van het product verlengd.

## Maximale levensduur van de motor

Er wordt gebruikgemaakt van een geavanceerde PWM-regeling om micro-spanningspieken te onderdrukken die soms storingen veroorzaken bij 400V-motoren. Op deze manier is de motor extra beveiligd en wordt zijn levensduur verlengd.

## Automatische energiebesparing

De frequentieregelaar kiest altijd de optimale energiebesparende instelling om kosten bij toepassingen als ventilatoren en pompen te besparen. De frequentieregelaar kan het energieverbruik met meer dan 50% verlagen in vergelijking met standaard mechanische systemen.

## Betrouwbaarheid met verantwoordelijkheid voor het milieu

Omron is vermaard om de betrouwbaarheid van haar producten. Daarnaast wil Omron producten leveren die veilig zijn voor het milieu en dus geen verboden substanties bevatten.
